OAU Senior Staff Quarters, Road 7B, Hs 12d, Ife Central, Osun, 220005,
Nigeria

Backend Developer with 5 experience in fintech, web application, and SaaS platforms. Expertise in optimization, agile methodologies, efficient data management, and cross-functional collaboration. Proven record of improving system efficiency, user growth, and transaction processing.

Work Experience

Backend Developer

Dec 2024 - Present

Gappay | Port Harcourt, RIVERS

At Gappay, a fintech platform, I optimized user experience, streamlined workflows, and enhanced data storage strategies, ensuring compliance, 99.9% availability, and reliable financial solutions, which improved system efficiency by 45% in collaboration with a skilled team.

- Collaborated using agile development methodologies to design and deploy distributed systems with robust messaging platform integrations for financial services clients, leading to Improved efficiency of system by 50%
- Applied finance principles to back end development, ensuring efficient data management and transaction processing

Backend Developer

Oct 2024 - Present

3rd Link | OYO, Nigeria

As a Backend Developer at 3rd Link, I built and deployed a scalable web application supporting 50% user growth, upgraded server load by 75%, improved efficiency, cooperated on frontend integration, and proved a quick learner of new technologies.

- Maintained a friendly and collaborative approach when working with team members on backend development projects.
- Applied lean principles to optimize backend development processes and improve efficiency

Backend Developer

May 2024 - Present

OMEGA DIGITAL TECHNOLOGY INNOVATIONS | Ile Ife, OSUN

At Omega, I fine-tuned backend architecture for speed, reliability, and scalability, enabling 80% user growth.

- Developed and maintained robust backend systems using efficient coding practices.
- Integrated Automated Testing into the CI/CD pipeline for efficient backend deployments.
- Collaborated with a cross-functional team to design and implement scalable backend solutions

Backend Developer

Aug 2023 - Present

Tekcify | LAGOS, Nigeria

As a Backend Developer at Tekcify, I built SaaS applications and deployed APIs with Node.js and Python, integrating payment gateways and AI services. Optimized MongoDB queries, improving API efficiency by 70% and scaling the platform for 2x user growth.

- Collaborating closely with cross-functional teams, I delivered robust, feature-rich applications that improved both user experience and system reliability.

- Leveraged expertise in Mobile Development using flutter to support back end services and API integrations for mobile applications
- Applied debugging techniques to identify and resolve software defects, ensuring application stability and performance

Projects

Image search

Present

Image-Search is an OCR-powered tool that extracts text from images, locates queried matches, and highlights them within documents. It enhances text retrieval, accuracy, and readability in scanned files and images, making information easier to find and process.

DIDO

Present

Dido is a blockchain-powered donation platform leveraging web3 transparency for secure, traceable contributions. Built with Flask, Solidity, MongoDB, and GraphQL, I expanded scalable DeFi-backed systems. Now exploring Rust integration to boost performance, security, and scalability while ensuring credibility and usability.

Synex (social hub)

Present

A simple social aggregator app that lets users easily access multiple social platforms from a single interface. created with a clean navigator for a seamless, all-in-one social experience.

Mediic

Present

A web platform uniting technology and well-being, leveraging my programming skills in JavaScript, Node.js, and AI. It delivers medical consultations, scheduling, pharmacy search, and personalized advice, supporting communities with tailored care, wellness programs, and real-time AI assistance.

Core Skills

Python, Solidity, Typescript, JavaScript, Node Js, Nest Js, Django, Flask, Git, Docker, Github work flows, VPS, SQL, MongoDB, PostgreSQL, Mobile Development, C++, AWS, kubernetes

Education

Obafemi Awolowo University

Jan 2019 - Present

Bachelors Electronic and Electrical Engineering

Awards

Buidlcon web3 hackathon

OAU

Won Buidlcon web3 hackathon

Certificates

Django Master course with real world practical projects

Jan 2022

Udemy
